PARDO GT75

Pardo's GT75 is the largest model the builder offers in the GT range, and the new flagship of the entire Pardo fleet. Nauta Design created the exterior and interiors, which give owners the option of a galley-up or galley-down layout. Owners also have a choice when it comes to the belowdecks layout, which can include two, three or four staterooms. The cockpit is focused on guest relaxation, with foldout platforms that increase the real estate at anchor. An entire seating area lifts electrically to reveal a garage that houses the tender. Additional outdoor seating is forward, with separate areas for sunbathing or congregating around a table for cocktails and snacks. Still more guest seating is inside, fully protected from the elements with wide views of the outdoors.
