PARDO YACHTS UNVEILS THE NEW ENDURANCE 72

Pardo Yachts, renowned for its exceptional Italian craftsmanship and innovative design, proudly introduces the Endurance E72.

As the latest addition to the acclaimed Endurance range, this 72-foot powerboat sets a new standard for long-range cruising, offering a perfect balance of spacious interiors, advanced efficiency, and striking Italian design.

Eyachts, the exclusive importer for Australia and New Zealand is excited for what this model offers to the market. “The Endurance 72 is a true evolution of the Pardo brand,” says Peter Hrones, Managing Director of Eyachts. “It seamlessly combines performance, luxury, and sustainability, making it an ideal choice for those who want to explore the coastline with both comfort and efficiency.”

Designed for extended cruising, the Pardo E72 boasts expansive living areas, ensuring maximum comfort at sea. The cockpit extends into a vast 40-square-meter relaxation zone, enhanced by fold-down terraces and an aft platform, creating a seamless connection with the water. At the bow, an optional jacuzzi offers the ultimate indulgence, while the flybridge—spanning

27 square meters—introduces an innovative T-top with adjustable slats, providing optimal shading and ventilation.

Inside, the E72 offers two flexible layout options: Galley-up (four cabins, five bathrooms) or Galley-down (three cabins, four bathrooms with a private service kitchen below deck). Designed by Burdisso & Capponi Yachts & Design, the interiors exude understated elegance, with high-quality finishes such as matte grey walnut, Corian countertops, and refined lighting elements that enhance the yacht’s sophisticated atmosphere.

True to its name, the Endurance 72 is engineered for efficiency and long-range capability. The yacht introduces eco-speed technology, a performance parameter that maximises fuel efficiency and comfort while reducing consumption. With the option for hybrid propulsion, the E72 also aligns with Pardo Yachts’ commitment to sustainability.

In 2024 Pardo Yachts was the Official Supplier for the Luna Rossa Prada Pirelli team at the 37th America’s Cup

in Barcelona. The E72 was chosen as the team’s hospitality vessel, providing a luxurious and stable platform for guests and team members.

“At Eyachts, we have always been passionate about the America’s Cup, and to see Pardo Yachts play a role in this historic event is something truly special,” says Peter Hrones. “This partnership highlights Pardo’s reputation for innovation and excellence, aligning with the values of Luna Rossa Prada Pirelli.”

The E72’s expansive flybridge provides the perfect vantage point to follow the racing action, while its spacious design reflects the same high-performance philosophy that defines the Luna Rossa team. With its unparalleled design, advanced technology, and spacious layouts, the Pardo E72 is the ultimate long-range cruiser for discerning yacht owners. Exclusively available through Eyachts, this new flagship model delivers an unmatched boating experience for Australian and New Zealand waters.
